

Australian Science Communicators National Conference  
**ART AND SCIENCE IN DIALOGUE**  
Wednesday 10 February 2010, 2-3 pm

**THERE ARE SONGS IN THE SCIENCE**

ALL There are songs in the science  
in search of singers —  
If we make that music now  
we can change the climate!

CHORUS Songs in the science  
are lookin' for a chorus

ALL There are songs in the science  
in search of singers —  
If we make that music now  
we can change the climate!

CHORUS Listen to the Earth —  
to Nature's Law Songs

Harmony  
in those systems and cycles

Melody  
in every element

Rhythm in the cosmos  
Sing the rhythm of life!

Songs in the science  
are lookin' for a chorus

ALL There are songs in the science  
in search of singers  
If we make that music now  
we can change the climate

CHORUS Music to make  
Harmony  
Melody  
Rhythm of life

Songs in the science  
are lookin' for a chorus

ALL There are songs in the science  
in search of singers  
If we make that music now  
we can change the climate

Words and music by Glenda Cloughley

**HOW TO TELL ...**

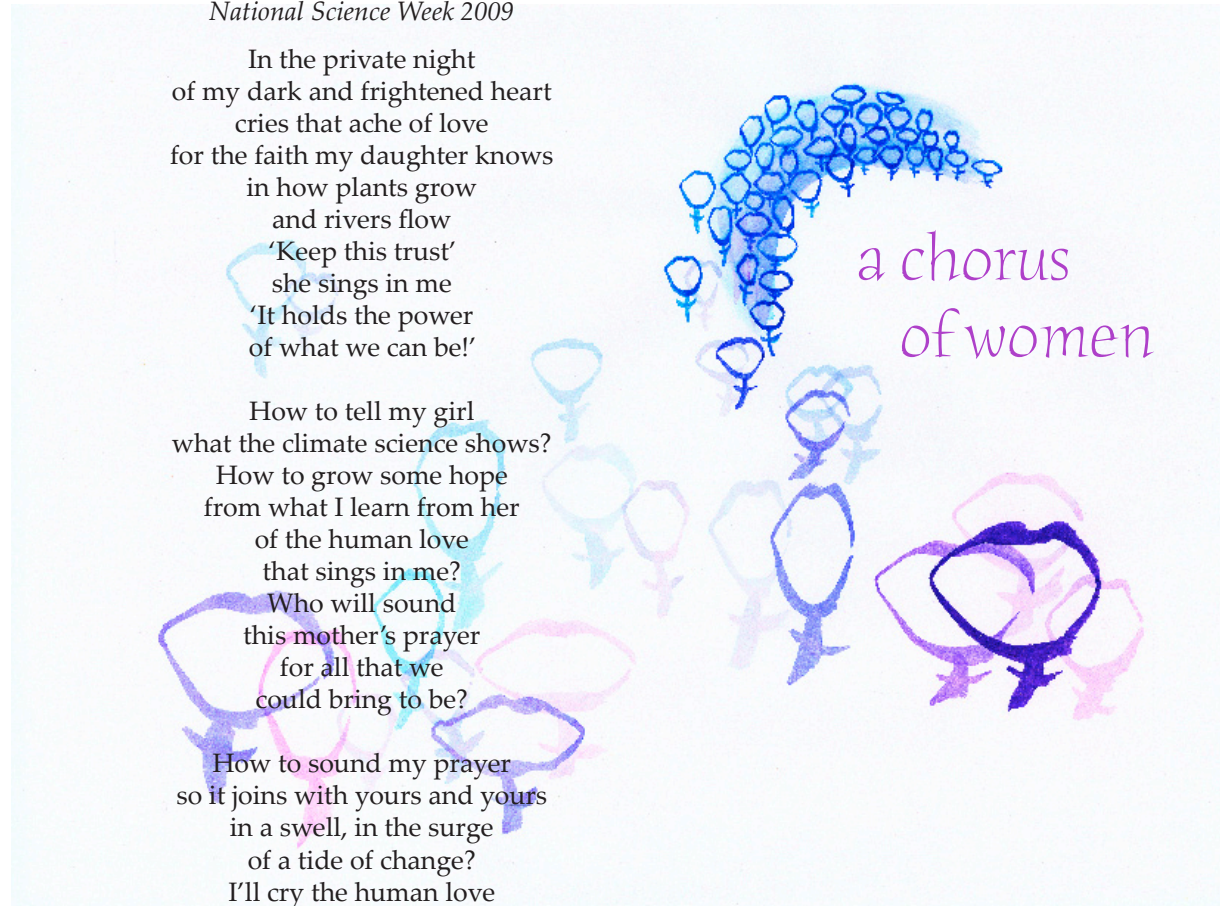

*Dedicated to Dr Nicky Grigg and Zoe  
National Science Week 2009*

In the private night  
of my dark and frightened heart  
cries that ache of love  
for the faith my daughter knows  
in how plants grow  
and rivers flow  
'Keep this trust'  
she sings in me  
'It holds the power  
of what we can be!'

How to tell my girl  
what the climate science shows?  
How to grow some hope  
from what I learn from her  
of the human love  
that sings in me?  
Who will sound  
this mother's prayer  
for all that we  
could bring to be?

How to sound my prayer  
so it joins with yours and yours  
in a swell, in the surge  
of a tide of change?  
I'll cry the human love  
that sings in me  
I'll sing my prayer  
in harmony  
with all that we  
could bring to be

Words and music by Glenda Cloughley
